React	Component-Based Architecture, JSX: JSX syntax, State Management, React Lifecycle, Event Handling, Request Lifecycle, React Hooks, React Router, Dynamic Routing, RESTful APIs Integration

PROFESSIONAL EXPERIENCE

Name of the Post	Organization	Period
Freelance Software Developer	Various Clients (Including Pharmaceutical Companies such as Crown Laboratories, SS Laboratories, and other companies)	December 2023 – Present
Project Manager	Misfit Technologies Ltd Flat-6a, House-47, Road-27, Block-A, Banani, Dhaka-1213 https://misfit.tech/	April 2021 - September 2023
Software Developer	Crown Laboratories 1352, College Road, East Jurain, Dhaka-1204	December 2019 - February 2021
Software Developer	One Zero Bd Ltd Level: 3/A, House: 1419/6/2, Block:#A, Khilgaon, Dhaka-1219, Bangladesh https://onezerobd.com/	June 2016 - March 2019
Assistant to the Manager	Hasan Associates Ltd Chamber of Commerce Building, 65-66, Motijheel C/A Dhaka-1000, Bangladesh	July 2015 - May 2016

Key Responsibility/Skills as a Software Developer

Coding and Programming: Write, test, and maintain clean, efficient, and scalable code to meet project requirements.

Collaboration: Work closely with other developers, designers, and stakeholders to ensure a cohesive and effective development process.

Problem Solving: Identify, analyze, and resolve software issues, including debugging code to fix errors.

Requirement Analysis: Understand project requirements and translate them into technical specifications.

Testing: Conduct thorough software testing to ensure functionality, reliability, and identify potential bugs.

Continuous Learning: Stay updated on industry trends, new technologies, and best practices for continuous professional growth.

Documentation: Create and maintain technical documentation for code, APIs, and systems.

Agile Development: Work within Agile methodologies, participating in sprints, stand-ups, and other Agile practices.

Database Management: Understand and work with databases, including designing schemas, writing queries, and optimizing performance.

Quality Assurance: Collaborate with QA teams to ensure high-quality software through testing and validation.

Web Development Skills: Proficiency in HTML, CSS, JavaScript, front-end library React and back-end frameworks Laravel.

Communication: Effectively communicate technical concepts to non-technical team members and stakeholders.

Time Management: Prioritize tasks and manage time effectively to meet project deadlines and deliver high-quality code.

UI/UX Understanding: Understand basic user interface (UI) and user experience (UX) design principles for better collaboration with designers.

Key Responsibilities/Skills as Project Manager

Attend client meetings and gather requirements from the client.

Prepare documentation based on client requirements.

Collect time estimations from developers and prepare QA time estimations.

Time management: Manage project timelines to ensure timely delivery.

Human Resource Management: Planning and identifying human resource needs.

Conduct daily Scrum meeting every morning to ensure team alignment.

Send meeting minutes to stakeholders after every meeting.

Prepare release notes and coordinate deployment processes.

Perform User Acceptance Testing (UAT).

Technical writing and documentation for projects.

Conduct business analysis to align client requirements with development.

Worked on the following projects as a Project Manager

Shopoth E-commerce: <https://shopoth.com/>

Genocide Museum: <https://genocidemuseum.org.bd/>

Previously worked on the following projects as a Software Developer

Enterprise Resource Planning (ERP)

Multivendor Ecommerce Project

School Management Software

CRM (Customer Relationship Management)

Websites and Software:

<https://unani.softenginebd.com> Credentials(maheenlabel@gmail.com, maheen*123)
